School

PARTNER PRICE LIST November 2018

Calculating the prices

Training Provider and Employer Pricing Calculation

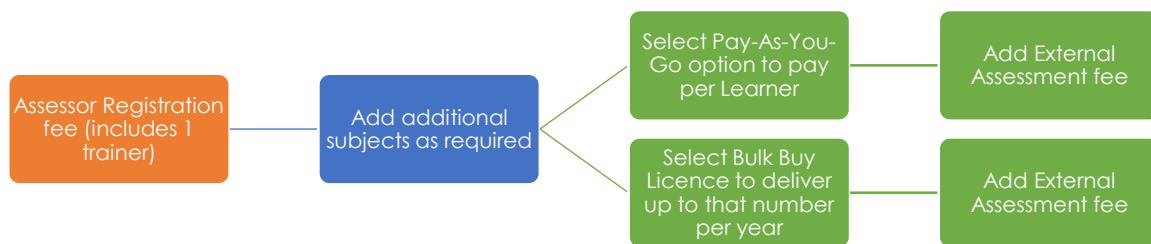

We only charge you for using the resources for the training, we do not charge registration or certificate fees, you access our online system to register your own candidates.

Centres sign up for a minimum of three years and must pay for a minimum of 12 learners per year (invoiced at the end of the year if not met). After this, for annual reviews centres must evidence their commitment to delivery of the course (such as regular delivery of the course) to renew. Licence fees are invoiced on a monthly basis, with a 3-month notice period after the first three years.

External Assessment fees only apply if a centre is unable to mark and internally verify assessments and cannot be funded by the apprenticeship levy in the UK. Appeals and Additional Moderation Visits are charged separately.

Assessor and Consultant Pricing Calculation

We only charge you for using the resources for the training, we do not charge registration or certificate fees, you access our online system to register your own candidates.

Individuals sign up for a monthly contract, with a three-month notice period. At the annual review, individuals must have either delivered a course or be planning to deliver a course.

External Assessment fee will apply as individuals are unable to put in place the internal verification process, these cannot be funded by the apprenticeship levy. Appeals and Additional Moderation Visits are charged separately.

All prices exclude VAT
